Upaya Mengangkat Taraf Hidup Nelayan Transaksi Perikanan Harus Ditingkatkan

[:id]**Bandung, (PR),** the head of Fisheries and Maritime Services of West Java Province, Jafar Ismail said, a number of fishing transaction locations and facilities of fishermen in West Java need to increase of its capacity in an effort to improve trade transactions of fish caught by the fishermen. This is one of the efforts to improve the business yield of the fishermen in West Java which in general at the moment is still distressing. According to Jafar, in Bandung, Monday (6/4/2015), the conditions of the fishermen in West Java at this time can be considered distressing. "The number of fishermen in West Java currently are around 100,000 people. As many as 70% is on the North Coast and 30% at the South Coast. The average income of each family of fishermen is only 2.5 million per month," he said related to the memorial fishing day 2015. Jafar stated, there are still many fishery facilities at the coast that require many repairs, including 84 fishing ports in West Java. In addition, most of the fishermen in West Java also still use boats with small capacity to sea. Such condition, said Jafar, continues to receive the attention of the Government. But many of the shortcomings currently require new management that could only be done gradually. Jafar admits, West Java this year has not received any aid of 30 GT boats. West Java, however, received five units of boats with the capacity of 15GT as aid, allocated for fishermen in the districts of Pangandaran, garut, Tasikmalaya, Subang, Indramayu.. Related to the fishing ports, Jafar confirmed that his party continues to encourage Fishing Ports in Sukabumi to be a Fishing Ports with greater capacity. In addition, the Central Government also bestows aid for the completion of repairs of the Cikadang and Cisolok fish auction locations. Jafar also did not deny that the issues regarding operational capital is still a major obstacle to the fishermen’s well-being. However, he had been informed that the financial services authority is currently ready to provide special credit assistance for fishermen reaching up to Rp 500 billion for the entire Indonesian fishermen. **Preparing to Harvest**
Meanwhile, the fishermen on the coast of Sukabumi are immediately gearing up to enter the harvest season early this year. Earlier, the fishermen are rumored to still experience fish famine since December 2014 in which the weather at sea was not possible to navigate because of rainy season and strong winds.   Functional officer in the field of fishermen control of the Maritime and Fisheries Services of the Sukabumi Regency, Dicky Riksandi mentioned, at this time the fishermen in Sukabumi are entering the end of fish famine, where the fish harvest that will be in a large amount after a famine are tuna fish and ribbon fish.   It's just that, he said, during the times of famine for almost five months now, the fishermen of Sukabumi Coast are relatively in the same condition since the fishermen of the Sukabumi Coast are unfamiliar with backup livelihoods in their own area, for example by cultivating freshwater fish.   West Java's fisheries observer, Muhammad Husen said, there are several fishermen earning a living in the city by becoming construction labour. However, in General, on a famine period they live their lives as it is. Mohammad Husen who is also the committee of the Archipelago fishery society said, actually the solution to create an alternative business-based fisheries has already been socialized, for example, the introduction of saltwater Tilapia fish cultivation such as on the beach of cianjur. However the alternative business does not seem to interest the fishermen even though salt water fish have a high share of market due to its delicious taste and differ from freshwater tilapia fish. Efforts to encourage the cultivation of fisheries businesses have also been directed by PT Bio Farma (Persero) Bandung that introduced the cultivation of freshwater fish on the beach of Ujunggenteng. The introduction of cultivating was carried out by Bio Farma’s President Director Iskandar through Corporate Social Responsibility around the year 2013. The Secretary General of the Indonesian Fishermen Union, Budi laksana said, other issues that are increasingly aggravating the lives of the fishermen are the supporting policies such as subsidized solar prices that are uncertain and banking access for fishermen is very complicated. The hike of subsidized solar price currently is causing supply costs through sea to rise up to 50%,”Usually to go to sea would cost Rp 1 million, now it could cost up to

Rp 1.5 million." He said. (**Handriansyah, Handri Kodar Solihat**) *** Source: Pikiran Rakyat   For further information, please contact: N. Nurlaela Arief Head of Corporate Communications Dept.   For further information, please contact: N. Nurlaela Arief Head of Corporate Communications Dept. Email : lala@biofarma.co.id Bio Farma Jl. Pasteur No. 28 Bandung Telp : 62 22 2033755 Fax : 62 22 2041306 [:ID]**Bandung, (PR).-** Kepala Dinas Perikanan dan Kelautan Provinsi Jawa Barat Jafar Ismail mengatakan, sejumlah tempat transaksi ikan dan fasilitas para nelayan di Jawa Barat perlu ditingkatkan kapasitasnya sebagai upaya meningkatkan transaksi perdagangan ikan hasil tangkapan para nelayan. Ini merupakan salah satu upaya meningkatkan hasil usaha para nelayan di Jawa Barat yang umumnya saat ini hidupnya masih memperihatinkan. Menurut Jafar, di Bandung, Senin(6/4/2015), kondisi nelayan di Jawa Barat saat ini memang terbilang masih memperihatinkan . " Jumlah nelayan Jawa Barat saat ini sekitar 100.000 orang. Sebanyak 70% ada di pantai utara dan 30% di pantai selatan . Pendapatan rata-rata setiap keluarga nelayan hanya 2,5 juta per bulan, " katanya terkait dengan peringatan hari nelayan 2015. Jafar menyebutkan, masih banyak fasilitas perikanan di pesisir yang membutuhkan banyak perbaikan , termasuk 84 pelabuhan perikanan yang ada di Jawa Barat. Selain itu, sebagian besar nelayan Jawa Barat juga masih menggunakan kapal berkapasitas kecil untuk melaut. Kondisi tersebut, kata Jafar, terus mendapat perhatian dari pemerintah . Namun banyaknya kekurangan saat ini membutuhkan penanganan yang baru bisa dilakukan bertahap. Jafar mengakui , tahun ini Jawa Barat tidak mendapat bantuan kapal 30 GT. Namun, Jawa Barat mendapat bantuan lima un it kapal berkapasitas 15GT yang dialokasikan bagi nelayan di Kabupaten Pangandaran, garut, Tasikmalaya, Subang, Indramayu.. Terkait dengan pelabuhan perikanan, Jafar menegaskan bahwa pihaknya terus mendorong Pelabuhan Perikanan Nusantara di Kabupaten Sukabumi untuk dijadikan Pelabuhan Perikanan Nusantara yang berkapasitas lebih besar.Selain itu, Pemerintah pusat juga tengan menguncurkan bantuan untuk menyelesaikan perbaikan tempat pelelangan Ikan Cikidang dan Cisolok. Jafar juga tak menampik jika masalah permodalan opersaional masih menjadi kendala utama minimnya kesejahteraan nelayan. Namun, ia telah mendapatkan informasi bahwa Otoritas Jasa Keuangan saat ini siap memberikan bantuan kredit khusus nelayan yang plafonnya mencapai Rp 500 miliar untuk seluruh nelayan Indonesia . **Bersiap Panen** Sementara itu, para nelayan di pantai Sukabumi bersiap-siap segera memasuki musim panen awal tahun ini. Sebelumnya, para nelayan dikabarkan masih mengalami masa paceklik ikan sejak desember 2014 lalu di mana cuaca di laut tak memungkinkan untuk dilayari karena musim hujan dan angin kencang. Petugas fungsional bidang pengawasan nelayan Dinas Kelautan dan Perikanan Kabupaten Sukabumi Dicky Riksandi menyebutkan, saat ini para nelayan di Sukabumi mulai memasuki akhir masa paceklik ikan, di mana panen ikan yang akan banyak pada musim panen ikan setelah paceklik adalah ikan tuna dan ikan layur. Hanya saja, katanya,selama masa paceklik ikan selama hampir lima bulan ini, para nelayan pantai Sukabumi relatif belum berubah nasibnya karena para nelayan Pantai Sukabumi belum terbiasa memiliki mata pencaharian cadangan di daerahnya sendiri, misalnya dengan membudidayakan ikan air tawar. Pengamat perikanan Jawa Barat Muhammad Husen mengatakan , sebagian nelayan ada pula yang mencari nafkah ke kota dengan menjadi buruh bangunan. Namun, secara umum, pada musim paceklik lebih menjalani hidup apa adanya. Muhammad Husen yang juga pengurus masyarakat perikanan Nusantara mengatakan , sebenarnya solusi menciptakan usaha alternative berbasis perikanan sudah disosialisasikan , misalnya memperkenalkan pembudidayaan ikan nila air asin seperti di pantai cianjur. Namun tampaknya alternative usaha tersebut belum layak diminati atau dikembangkan para nelayan padahal ikan air asin memiliki pangsa pasar yang tnggi karena rasanya yang enak dan berbeda dibandingkan dengan ikan nila air tawar. Upaya mendorong usaha perikanan pembudidayaan pun pernah diarahkan PT. Bio Farma (Persero) Bandung yang memperkenalkan pembudidayaan ikan air tawar di Pantai Ujunggenteng. Pengenalan pembudidayaan tersebut dilakukan Dirut Bio Farma Iskandar melalui Corporate Social Responsibility sekitar tahun 2013 lalu. Sekretaris Jendral Serikat Nelayan Indonesia Budi laksana mengatakan , persoalan lain yang semakin memperparah nasib nelayan saat ini adalah kebijakan pendukung seperti harga solar bersubsidi yang tak menentu serta akses perrbankan bagi nelayan yang sangat sulit. Kenaikan harga solar bersubsidi saat ini kembali membuat biaya perbekalan melalui melaut naik sampai 50% ," Biasanya sekali melaut hanya butuh

Rp 1 juta , sekarang bisa sampai Rp 1,5 juta.” Ucapnya. **(Handri Handriansyah, Kodar Solihat)*** Sumber : Pikiran Rakyat[:]
